\$41,350.00

Business Conducted between Members in 2018
\$1,449,617.00

40-40-20 Jackpot
\$399.00

SONITROL®

VERIFIED ELECTRONIC SECURITY

Our technology sets us apart. The ability to verify an alarm event in real time gives Sonitrol unrivaled credibility with local law enforcement. That is a key advantage as a growing number of municipalities pass Verified Response regulations requiring verification that an intrusion is actually taking place before police will dispatch personnel to the site.

Sonitrol, the innovator of verified electronic security solutions, is known for the apprehension of burglars and intruders for over 5 decades. Since pioneering verified surveillance alarms with its first franchise in 1964, Sonitrol has dedicated the past half century to refining and updating its unique impact-activated audio verification technology to deliver 100% volumetric coverage of businesses, schools and homes — all monitored in real-time. Founded to maximize the efficiency of local law enforcement agencies' time and resources, Sonitrol's alarm verification technology and protocols have built an unrivaled reputation with police departments throughout the United States, Canada and the United Kingdom. Sonitrol.....the best apprehension rate in the industry—and the fewest dispatches for false alarms.

And our integrated system allows us to customize a solution to include other services such as managed *access control*, *fire*, and *CCTV*.

Full Line of integrated Security Solutions

At Sonitrol, we can deliver everything you need from a single source and backed up by our unrivaled guarantees. From Intrusion Alarms, to Access Control to Fire Monitoring to Video Surveillance - we can do it all!
