\$40,500.00**

**Business Conducted between
Members in 2018
\$438,385.00**

**40-40-20 Jackpot
\$82.00**

Penta-Con Services

Penta-Con Services offers many repair solutions to various concrete problems.

Established in May 2003, we serve the Greater Hamilton area. Our main area of work is with residential dwellings, but we also service commercial and industrial properties.

A large portion of our work pertains to leaking foundations. We offer non-invasive, permanent solutions, mostly done from the interior. Poured concrete foundation walls are usually repaired with a urethane injection system. Block or fieldstone foundations typically receive an interior drainage system. This ensures a dry basement without mold, creating a healthier living space, and also protects furniture, carpets and other belongings from water damage.

A wet basement reduces property values, often scaring potential buyers away, whereas a basement repaired by Penta-Con Services comes with a written transferable guarantee that offers a problem free, usable space.

Penta-Con Services also pours new walkways and patios in a variety of finishes, including coloured concrete and exposed aggregate.

So many properties, regardless of age, have problems such as:

- Water seepage into basements
- Uneven walkways and steps
- Sunken and/or cracked garage floors
- Ice and water damage resulting in spalled concrete and loose parging
- Floors that need non-slip coatings e.g. garages, laundry rooms
- Window well issues
- Leaking balconies
- Broken and damaged curbs
- And many more!

We assess each problem individually and are able to offer long-term and cost-effective solutions to the property owner, using high quality repair materials.

Concrete solutions by Penta-Con Services equal peace of mind, whether buying, selling, or simply enjoying one's property.
